Our Program

National Environmental Education (EE) Week is the largest organized environmental education event in the United States. EE Week promotes understanding and protection of the natural world by creating a full week of environmentally-themed lessons and activities in K-12 classrooms, nature centers, zoos, museums, and aquariums.

EE Week Partner Spotlight

Inland Seas Education Association - Suttons Bay, Michigan

From Saturday April 18 through May 10, 2009, the Inland Seas Education Association (ISEA) will host Beach Cleanup events to remove trash from the shoreline of Lake Michigan and inland waterways. Over the last 20 years, ISEA has organized spring Beach Cleanup events that keep the shoreline of rivers, lakes and streams clean throughout Northwest Michigan. Later in the spring, ISEA will conduct underwater cleanups. These cleanup events bring together students, fishermen, boaters, businesses, government employees, scuba divers, scout troops and others who care about Michigan's beaches and waters. Featured Resource

Water: H₂O = Life

The Water: H₂O = Life Web site is a companion to the American Museum of Natural History's exhibit of the same name. The Web site and exhibit explore the relationship between water and life, water's physical and chemical properties, how water is used by humans, and the importance of preventing water pollution. You will find excellent information and graphics on water issues, educator resources, lesson plans, articles for all grade levels and games and web activities for students. The exhibit will be on an international tour through September 2011. [Learn more](#)

[More On Us](#)

The [National Environmental Education Foundation](http://www.neefusa.org) (NEEF) provides knowledge to trusted professionals who, with their credibility, amplify messages to national audiences to solve everyday environmental problems. Together, we generate lasting positive change.

NEEF partners with professionals in health, education, media, business, and public land management to promote daily actions for helping people protect and enjoy the environment. Through our primary programs - Classroom Earth, National Public Lands Day, National Environmental Education Week, Business and Environment, Earth Gauge and our Pediatric Environmental History Initiative - we offer Americans knowledge to live by.
