Our Program

National Environmental Education (EE) Week is the largest organized environmental education event in the United States. EE Week promotes understanding and protection of the natural world by creating a full week of environmentally-themed lessons and activities in K-12 classrooms, nature centers, zoos, museums, and aquariums.

Water Tip of the Day

Pick up litter in your neighborhood and on your school grounds - everything eventually ends up in a water body.

EE Week Partner Spotlight

H2O for Life

H2O for Life provides global partnerships that transform lives abroad and in the classroom. Currently 115 schools in the United States are working to provide clean water, sanitation and hygiene education for schools in need. H2O for Life provides resources that educate students about the global water crisis and provides classroom activities that engage students in a meaningful service-learning project. During EE Week, many H2O for Life schools, including Centennial Middle School in Minnesota, will host "Walks for Water." They hope to raise \$10,000 to bring water, toilets and hand-washing stations to schools in Bolivia, Nicaragua and Bangladesh. Valentine Hills Elementary School, in Arden Hills Minn. will sell H2O for Life wristbands as part of a fund-raising activity to bring clean water to Mahwa School in Uganda. Students will study global water issues and participate in activities to raise awareness about water in their community. Abington High School in Penn. is raising funds to bring clean water to a school in India. [Learn more](#)

Featured Resource

A Day in the Life of a Drop

A Day in the Life of a Drop is a set of activities developed by the U.S. Environmental Protection Agency to help students understand the connections between the source of the water they use and the ways their water use habits affect the environment and human health. Students also learn how to reduce water use and engage family members. After completing the worksheets provided on the website, students and families take the Pledge to Filter Out Bad Water Habits to demonstrate a commitment to saving water for the future. The [National Environmental Education Foundation](#) (NEEF) provides knowledge to trusted professionals who, with their credibility, amplify messages to national audiences to solve everyday environmental problems. Together, we generate lasting positive change.

NEEF partners with professionals in health, education, media, business, and public land management to promote daily actions for helping people protect and enjoy the environment. Through our primary programs - Classroom Earth, National Public Lands Day, National Environmental Education Week, Business and Environment, Earth Gauge and our Pediatric Environmental History Initiative - we offer Americans knowledge to live by.
